

### Perpetual License - On Premise Solution

For a 'one-time' license fee customers can use the software perpetually at no additional cost. The software can be deployed on the client's existing infrastructure (on-premise). An optional maintenance fee entitles customers to product upgrades and helpline/technical support.

### Implementation

- Requirements gathering -- our consultants will work with your management team to identify the unique aspects of your business including business frameworks, terminology and corporate hierarchy.
- Customization and installation -- our engineers will customize Unify products to include your terminology and corporate hierarchy, and work with your technical team to define and procure the right hardware as well as install the product on your servers.
- Integration -- if required, our engineers will work with your technical team to deploy Unify products and integrate with your Intranet, ERP, CRM, Data Warehouse, or any other 3<sup>rd</sup> party system.
- Deployment -- our consultants will train your system administrators and facilitate your initial planning sessions.

With standard customization, the implementation process can take as little as days.

### Server Requirements\*

Web / Application Server	Database Server
<ul style="list-style-type: none"><li>• Microsoft Windows 2000 or 2003 server</li><li>• 2GHz Processor</li><li>• 1GB RAM</li><li>• 10GB available disk space</li><li>• Microsoft IIS (or BEA Weblogic, IBM Websphere, Apache Tomcat)</li></ul>	<ul style="list-style-type: none"><li>• Microsoft Windows 2000 or 2003 server</li><li>• 2GHz Processor</li><li>• 1GB RAM</li><li>• 20GB available disk space</li><li>• Microsoft SQL Server 2000 (or DB2, Oracle, Sybase, MySQL)</li></ul>

\* Requirements will vary by client based on organization requirements, size and complexity.

### Desktop Requirements

- Client machines with access to the internet and Internet Explorer 6.0 or higher

## Unify Product Fact Sheet

### **Subscription License - ASP Solution**

An annual 'rental' fee gives customers the right to use the software. Annual fees cover the license rental, maintenance and product upgrades, and helpline/technical support. An additional annual hosting fee is required to have Protia host (install and support) the software in their secure server environment.

### **Implementation**

- Requirements gathering -- our consultants will work with your management team to identify the unique aspects of your business including business frameworks, terminology and corporate hierarchy.
- Customization -- our engineers will customize Unify products to include your terminology and corporate hierarchy.
- Integration -- if required, our engineers will work with your technical team or 3<sup>rd</sup> party providers to deploy and integrate Unify products with any other internal or external systems.
- Deployment -- our consultants will facilitate your initial planning sessions.

### **Desktop Requirements**

- Client machines with access to the internet and Internet Explorer 6.0 or higher
