

In House Solutions

Protia offers in house implementation allowing your organization to implement state of the art Business Performance on your existing infrastructure.

Implementation

- Requirements gathering -- our consultants will work with your management team to identify the unique aspects of your business including business frameworks, terminology and corporate hierarchy.
- Customization and installation -- our engineers will customize Strategic Line-of-Sight to include your terminology and corporate hierarchy, and work with your technical team to define and procure the right hardware as well as install the product on your servers.
- Integration -- if required, our engineers will work with your technical team to integrate Strategic Line-of-Sight with your Intranet, ERP, CRM, Data Warehouse, or any other internal and 3rd party systems.
- Deployment -- our consultants will train your system administrators and facilitate your initial planning sessions.

With standard customization the implementation process can take as little as days.

Server Requirements

| Web / Application Server | Database Server |
|--|--|
| <ul style="list-style-type: none">• Microsoft Windows 2000 server• 2GHz Processor• 1GB RAM• 10GB available disk space• Microsoft IIS (or Apache) BEA Weblogic (or IBM Websphere, Tomcat) | <ul style="list-style-type: none">• Microsoft Windows 2000 server• 1GHz Processor• 1GB RAM• 20GB available disk space• Microsoft SQL Server 2000 (or DB2, Oracle, Sybase, MySQL) |
